

**Input from Korea.**

Thank you for your efforts concerning MCSYM

I sent the e-mail in regard to ToR and RoP of the Informal Group in 5th November to you.

Unfortunately, I think you didn't get the e-mail

I'm sorry for it

By the way, We are discussing with manufacturers on Motorcycle controls, tell-tales and indicators.

In principle, We support the proposal of WP.29/2006/74

and I'd like to agreed to comments of EC on the proposal(GRSG-97-14) for GTR on Motorcycle controls, tell-tales and indicators.

We are dwelling on location of motorcycle controls because there are few regulations on it in Korea

In my opinion, we need the regulation on it in Korea

We need more the time to discuss with others on it
