

WLTP DTP PM/PN subgroup	
Date	9 August 2010
Title	PM/PN Subgroup 2 nd Web Conference Agenda
Working Paper Number	WLTP-DTP-PMPN-02-01

1. Review of Actions from Previous Web Conference
 - i) Chair to circulate current US, UNECE and Japanese regulatory texts
 - ii) Chair to invite CARB to participate in the subgroup and/or provide their views on future development of PN measurement procedures within CARB legislative requirements
 - iii) JAMA to report back on whether JAMA or JASIC are willing to review the Japanese legislation for PM & PN relevant content.
 - iv) Chair and Co-chair to agree and circulate a template for reviewing PM and PN procedures in existing regional legislation
 - v) Chair to seek clarification from EPA of whether partial flow dilution systems are likely to be permitted in US legislation in future for PM sampling for light duty vehicles.
2. Review of Strategic Decisions
3. Comparison of regional legislation (progress)
4. Subdivision of subjects for comparison and allocation of work
 - Transfer from vehicle and dilution system requirements
 - PM sampling probe, sampling conditions, filter holder & papers
 - Weighing room/chamber specifications
 - Test procedure including filter conditioning & handling
 - Periodically regenerating devices
 - Calculations & corrections
 - Calibration frequency & requirements
5. Identification of Any Open Issues
6. Other business
