

## **Proposal for amendments to the 09 series of Amendments to UN Regulation No. 83 (Emissions of M1 and N1 vehicles)**

This document proposes amendments to the working document WP.29/2026/25 by removing two paragraphs which were missed in previous amendments and thus has no connection to the work of IWG AVRS. The modifications to the current text of the Regulation which are additional to the working document mentioned above are marked in bold for new or strikethrough for deleted characters.

### **I. Proposal**

*Annex 1, paragraph 3.4.3., to be deleted.*

*Annex 2, paragraph 1.9.2., to be deleted.*

### **II. Justification**

1. The concept of “Operating Mode Switch” has been removed from Regulation No.83 and these two paragraphs were omitted from this removal. As they offer no useful information they should be deleted from both the manufacturer’s information document (Annex 1) and the addendum to the approval certificate (Annex 2).

2. The same documentation requirements were removed from the 08 series of amendments by GRPE 93, the only difference is the paragraph numbering.
