# Proposal for amendments to GRE-92-12e

Proposal for amendments to GRE-92-12e

➢ GRE-92-12e:

Add new paragraph 5.35.12. to read:

"5.35.12. ~~Driver Assistance Projections, which are intended to support the driver only, shall not be activated if the ADS is active.~~"

Driving task architecture according to R157

> During DDT phase, surrounding risks should also be earlier indicated to human driver, to help the driver to make correct decisions, and as a positive effect of predicted trajectory light, early identification of risks on driving lane works for both human eyes and camera system. So, **Driver Assistance Projections shall not be deactivated**.

THANK YOU.
